## Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

## **Listing of Claims**:

- 36. (Currently amended) A method of treating a CCR2-mediated disorder mediated by activation of CCR2 by binding of a chemokine in a patient, comprising administering to the patient an effective amount of a humanized immunoglobulin or antigen-binding fragment thereof having binding specificity for CCR2, said immunoglobulin or fragment comprising an antigen binding region of nonhuman origin and at least a portion of an immunoglobulin of human origin.
- 37. (Original) A method according to claim 36 wherein the disorder is an inflammatory disorder.
- 38. (Previously presented) A method according to claim 36, wherein the disorder is restenosis.
- 39. (Previously presented) A method according to claim 38, wherein said restenosis is associated with vascular intervention in said patient.
- 40. (Previously presented) A method according to claim 39, wherein said vascular intervention comprises angioplasty.
- 41. (Previously presented) A method according to claim 39, wherein said vascular intervention comprises stent placement.

Applicant : LaRosa et al. Attorney's Docket No.: 10448-217002 / MPI98-Serial No. : 10/766,773 129CP2RCEDV1

Filed: January 27, 2004

42. (Previously presented) A method according to claim 39, wherein said vascular intervention comprises angioplasty and stent placement.

- 43. (Previously presented) A method according to claim 36, wherein the disorder is associated with narrowing of the lumen of a vessel in said patient.
- 44. (Previously presented) A method according to claim 36, wherein the disorder is associated with neointimal hyperplasia of a vessel in said patient.
- 45. (Previously presented) A method according to claim 44, wherein said neointimal hyperplasia is associated with vascular intervention in said patient.
- 46. (Previously presented) A method according to claim 45, wherein said vascular intervention comprises angioplasty.
- 47. (Previously presented) A method according to claim 45, wherein said vascular intervention comprises stent placement.
- 48. (Previously presented) A method according to claim 45, wherein said vascular intervention comprises angioplasty and stent placement.
- 49. (Currently amended) A method according to claim 36, wherein said <del>CCR2-mediated</del> disorder is an autoimmune disorder.
- 50. (Previously presented) A method according to claim 49, wherein the autoimmune disorder is selected from the group consisting of multiple sclerosis and rheumatoid arthritis.

51. (Previously presented) A method according to claim 50, wherein the autoimmune disorder is multiple sclerosis.

- 52. (Currently amended) A method according to claim 36, wherein the CCR2 mediated disorder is selected from the group consisting of atherogenesis and atherosclerosis.
  - 53. (Cancel)
- 54. (Currently amended) A method of treating a CCR2-mediated disorder mediated by activation of CCR2 by binding of a chemokine in a patient, comprising administering to the patient an effective amount of a humanized immunoglobulin or antigen-binding fragment thereof having binding specificity for CCR2 comprising a heavy chain and a light chain, wherein said light chain comprises at least one complementarity determining region derived from murine monoclonal antibody 1D9 and a framework region derived from the light chain of human antibody HF-21/28, and wherein said heavy chain comprises at least one complementarity determining region derived from murine monoclonal antibody 1D9 and a framework region derived from the heavy chain of human antibody 4B4'CL.
- 55. (Previously presented) A method according to claim 54, wherein the disorder is associated with inhibiting restenosis in said patient.
  - 56. (Cancel)
- 57. (Previously presented) A method according to claim 54, wherein the disorder is an autoimmune disorder.
- 58. (Previously presented) A method according to claim 57, wherein the autoimmune disorder is rheumatoid arthritis.
